Winemaking

Early harvest for the production of our "lágrima" claret. Vino de lágrima is pure grape juice that flows from the grapes before any pressing. Respecting our natural environment through every stage of the process, from sustainable viticulture practices at the vineyard through to completion of winemaking at the winery.

TASTING NOTE

Pale currant color.

On the nose, a mineral base with hints of red berries and white flowers.

On the palate, it shows a silky attack and a lively character where freshness stands out thanks to good natural acidity. A persistent finish that promotes investigation of new food pairings.
